

PNEUMATIC SELF-LEVELING TABLES

Galvanized, stainless steel, and Steel-It paint available for wash-down applications

Tough enamel paint standard in safety yellow or optional in any specified

Bleed off valve and air pressure gauge to control the operation of the unit

Oil-impregnated bushings at all pivot points for increased life

Firestone Airstroke actuators have manufacturer's lifetime warranty

Structural steel construction for superior strength and durability

Features and Benefits

- 450 lbs. to 4500 lbs. capacity
- 24" of vertical travel to 33" raised height
- Optional oversized platforms available to 56" x 72"
- Optional rotating turntables available
- Spring and manual detents available with turntables
- Hinged top provides easy access to air bag
- Compressed air in the bag supports the load
- Once the air bag is inflated to the appropriate pressure, the selfleveling table maintains a convenient working height under all changing load conditions.
